

# PROJECT MANAGEMENT SERVICES

ASTI ENVIRONMENTAL

Planning is a critical stage in any environmental project, however, implementation, documentation, and closure are just as important to achieve successful completion. Unfortunately, projects often struggle during the planning stage and never make it to closure. Having an experienced environmental consultant provide project management will help you identify intended outcomes while moving toward closure. In addition, once you have established a budget, a qualified project management team will complete your project without exceeding that limit.

## PROGRAMS

---

ASTI Environmental (ASTI) has been providing consulting services since 1985 and have established relationships with various entities to complete all projects. ASTI offers project management for your projects through the following services:

- Project Implementation
- Construction Management
- Contractor/Subcontractor Evaluation
- Contract Management
- Project Cost Control
- Peer Review
- Quality Assurance Review
- Site Specific Health and Safety Plans

## ASTI SOLUTION

---

ASTI has been managing projects since 1985 and has developed teams of professionals to manage any environmental challenge. By teaming with ASTI you will receive the following:

- Intended Outcomes
- Established Subcontractors
- Quick Project Start
- Budget Control
